There is a option to turn the  
sound off, .1. Technical Field

This invention generally relates to  
a bicycle capable of at least two  
road bicycle functions such as  
touring and racing and, more  
particularly, to a bicycle having  
an electric assistance unit that

---

may be powered by a battery pack having two sets of batteries wired in series. 2. Background Art Conventional bicycles utilize bicycle lighting and bicycle signal devices in order to be seen and to warn of an approaching vehicle. Conventional bicycles may also provide electrical power to an internal hub motor. Conventional light sources may be utilized for these purposes, but may present drawbacks when it comes to illuminating a bicycle at night.

---

Conventional bicycles may not provide adequate and even bicycle lighting while touring. Moreover, conventional bicycles may not provide adequate warning to an approaching vehicle. Conventional bicycles may also use the hub motor for propulsion. However, the hub motor often provides an undesirable level of resistance to the drive source and the drive source often produces a high level of wear and tear on the bicycle.

---

Accordingly, it would be beneficial to provide a bicycle that combines the best features of conventional bicycles with a bicycle having bicycle lighting and bicycle signal devices, and also having an electric assistance unit that may be powered by a battery pack that may be easily and safely charged.

Q: No Transport Header Error for SFDC SOAP request with header I have a current web service that works perfectly using SOAP in

---

Salesforce, but I need to be able to pass in a header from Salesforce. I am using Salesforce SOAP to make my request, and I am getting a "No Transport Header" error at the header line.

Here is the web method that works great. [System.Web.Services.WebMethod] public static string CreateOrder(string orderField) { Order entry = new Order();  
entry.SubmissionStatusID\_\_c = 1;  
entry.Customer\_\_r.Name = "O
