BlackWidow makes it really easy to identify broken links on your site. Use the free trial to locate your errors quickly. Search for broken links by regular expression, or simply look for the error code in the source code of the page you're viewing. Download Backlinks Monitor 1.0.4.8 by: "Download Backlinks Monitor" is a useful utility that allows you to quickly download and view your website's backlinks. Installation: Start the program and then click the "Download Backlinks Monitor" icon on the toolbar. When the download is finished, double-click on the file Backlinks Monitor.exe to install the program. When the installation is completed, start the program by double-clicking on the icon named Backlinks Monitor on the desktop. Main features: The app records the HTTP (HyperText Transfer Protocol) requests sent by your computer so you can identify websites that don't work properly and get a detailed report on their condition. While this is not a scanning utility, Backlinks Monitor's data quality, flexibility, and technical support make it a great tool for a wide range of purposes. The program works with Mozilla Firefox, Google Chrome, Internet Explorer 9, Opera, and Safari browsers. Different browsers don't share the same web address system, so a few of them have some quirks in terms of addressing and coding. This app records the address of the Internet pages that your browser visits and stores them in a database. You can easily search for

a specific URL, or list all of the addresses visited. The program is easy to use. Just follow these instructions: While using the app, you have to enable several features. The interface is detailed and simple. It shows links that didn't open, and the details of the links that did load, with the source code where the link was found. The program provides a detailed history of your browsing sessions. Each new entry is highlighted in red. You can simply click the magnifying glass symbol on the top left of the interface to access the history. The browser interface contains a list of the bookmarks you added. You can click on the arrow symbol to go to the bookmark page. The address bar of the browser lets you open any website that you have stored in the history. The search bar allows you to quickly select any URL in the history. The search bar opens a side panel with the search results. Download
