You. to different endpoints */public function endpoints(): array { return \$this-> endpoints; } /** Create a new instance of this service */ @return void */ public function _construct() { \$this->name = 'search'; \$this->endpoints['search'] = \$this->getSearchService(); } } Q: Odoo OpenERP Restfull WS I'm using odoo 5.0 and trying to create a restful WS with the following url I've activated the restful WS following the odoo guide. Currently I'm not getting any response from the server and from the logs I can see that the application is waiting for a HTTP 404 response. Based on the Odoo guide I think the WS is working fine because the is_active tag is set to True. When I go to the page it works fine. Any idea of why the WS is returning a 404? A: It's because the Web Service request is done using the web_services module. You have to remove this from your version of Odoo and have only one of the 2 web_services (back_end or web). Here is an example of this code in my version :

Electricity company home automation key fob remote.Venezuela | Neta Martínez Mensaje de prensa de la vicepresidenta del gobierno de Maduro Por El Consejo de Estado venezolano, con este mensaje de prensa, expresa su repulsa a la propuesta de la "Alianza de los Pueblos del Perú" que pretende agregar más violencia a la actividad política en la región. La tarea del gobierno de Venezuela debe ser la apertura de canales de diálogo constructivo en el territorio venezolano y en la región. Por lo mismo, el Consejo de Estado reitera su pleno respeto a las decisiones de los pueblos y gobiernos de los países de Amé
