## What's new:

**Tue, 12 Jul 2015 02:33:36 +0000 Jeux & Contenus**As someone who learned a lot of programming languages (not to mention has a degree in IT Engineering), I also think that C# is a great tool for making game programming easier. Various aspects of the C# language fit with game making very well. Name: C# 5 Vs. video game 2: d'Orb 4 (Adventures of Lizeea 2) Author: VALLEPOUSAerial Designer are you interested in the virtual life of the princess Lizeea and its thousands of adventures, animals and insects? And do you like to create your own drawing, use the new online tools and enjoy the 3D world? If yes, follow the instructions to create your own adventure. C# 5 Vs. video game 2 : Lizeea 4 C# 5 Vs. video game 2 is a new adventure game developed by Sergey Pavlovich German and built on the Forge JavaScript engine. The story of the game is pretty well, the game is of an adventure similar to the life of the princess Lizeea from the Realms of Vallepus. The game is an additional extended version of the first game C# 5 vs video game: Lizeea 3. Presentation: You will have to the various events with the help of the administrator and the master of the Lizeea and lived in the Cours Jolyn 2010. Exist various events (the first, the second...) Castle, temples, meeting places, fun, puzzles, etc. Play control: You control the action by the collision of the menu or by using the mouse. Graphics: Animated and static game graphics. Music: The soundtrack has already been divided into three versions of the game: Mono version (without graphics), with graphics (same as the PC version) and with graphics and 3D (animated). In a nutshell, I would recommend this game to the gamers
